

Fuel Management Overview

Fuel management made easy

Toyota Fleet Management (TFM) offers a choice of market leading solutions to help provide effective fuel management for your business. Our detailed reporting and fuel card options are a smarter way to look after this critical and often costly part of operating your fleet.

How does it work?

With years of experience, TFM is ready to help your business achieve greater fleet efficiency. Great fuel discounts off the pump price are just the start with either a TFM Motorpass or AmpolCard. We'll then manage all aspects of your fuel card administration, including personalised detailed reporting, helping to save you further time and money.

What else does it offer?

We’ll save you valuable admin time and money by including all fuel transactions and any other products or services we’re managing for your fleet on a single monthly TFM invoice. Using a TFM Fuel Card also eliminates the need to manually reimburse drivers’ fuel costs and process separate fuel invoices. Plus, you can restrict the types of purchases on cards, eliminating unexpected expenses and helping provide greater control over your spending.

We also collect odometer readings at the time of each fill to give you a clear overview of your fleet’s activity. This powerful tool is behind TFM’s comprehensive reporting that help’s save you substantial time and costs.

The comprehensive reporting includes:

- Notification of vehicles due/overdue for service
- Tracking and reporting of vehicle usage against agreed kilometre allowance
- FBT management and reporting
- CO² reporting
- Fuel transactions by business unit, cost centre and vehicle
- Customisable fuel exceptions, enabling you to monitor fuel purchases and minimise costs.
